GRUPPO FOPPA'S STRATEGIES

MISSION AND STRATEGIES BECOME TEACHING METHOD

It is our "philosophy" to apply a policy of constant and progressive improvement of the training realities. Our goal is shaped beginning with the intuition of cultivating and sharing a culture for quality organization of work, which can determine change.

Our training realities are tools in the hands of the natural inclination of the local territory. In 2000, we introduced a teaching method based on alternating school time to work time, researching and developing partnerships with the businesses of the local territory, with authorities and trade unions. The so-called active work-link is the learning pattern that allows us to unite classroom training with practical experience every day. Focusing on implementing this feature, we have included an Employment Services office to our structure, through which we actively promote curricular and extra-curricular internships, business simulation experiences, projects in cooperation with companies and apprenticeship.

OUTSTANDING TRAINING OFFER INTERNATIONALIZATION innovative staff training CREATION OF A VIRTUOUS INSTITUTIONAL NETWORK CONSISTENT and ONGOING Constant updating of the training offer Higher access to the world of work TECHNOLOGICAL EFFICIENCY

Our main educational and learning mission is to train youth, prepare them for the labor market, also through direct and consistent experience. • Gefran Spa • Ghial Spa • Gibilo • Hotel Vela Di Polettini M. CHOICE -SERVICES

GUIDANCE COUNSELLING: SantaGiulia Academy has an internal guidance counsel office which supports students in choosing the right course of studies and advises on accommodation retrieval.

INTERNATIONAL PROJECTS: SantaGiulia Academy promotes mobility and international teacher and student exchange through Erasmus+ Program and the development of study/work projects abroad.

WORK PLACEMENT: Within SantaGiulia Academy there is a business relations and employment services Office that deals with training, internships and guidance counselling, promotes apprenticeship projects and supports every student as they enter the world of work.

SantaGiulia Academy is positioned in a strategic point of the city, pretty close to the city centre and well serviced with public transport service.

The building is distributed on 8.000 squares meters, with classrooms, laboratories and high tecnologies equipments, wired with the optical fiber and with free wireless system for students and teachers.

The great building, includes a wide range of laboratories, used for different teachings such as photography, interior design, decoration, painting, engraving, multimedia design, sculpture and video.

All the didactic classrooms are equipped with a video projector or a television. Five new informatics laboratories with latest generation MAC and PC with updated softwares for the graphics design, 3D modelling, animation and video post-production.

All the computers (MAC/PC) are equipped with Adobe Creative Cloud. The auditorium is a main space where all the master classes take place, carried on during all the academic year, with famous personalities of the artistic, culture and creative world.

There is also a cafeteria exclusively opened for the students and teachers of the institution. An entire floor is dedicated to the Direction and Secretary offices. Moreover, within the building, the new restoration laboratories have been set down.
